

AUTOMOBILE DASHBOARD ANALYSIS

Sales performance & Business insights using Power BI

Introduction

This Project focuses on analyzing automobile sales data using Power BI to understand sales trends, profitability, customer preferences, and regional performance. The dashboard converts raw data into meaningful insights for better business decision-making.

Objective

- Analyze Total sales across Brands and countries
- Track monthly and yearly sales trends
- Measure profit and cost performance
- Identify top-selling products and customers
- Improve sales strategy through data insights

DATASET INCLUDES

- Invoice Date
- Make
- Model
- Country
- Sales price
- Cost price
- Discount
- Delivery Charges
- Customer
- Vehicle Type
